Phoenix Union High School District

Phoenix Union High School District (PXU) is one of the largest and most progressive high school districts in the United States. With 24 schools, tens of thousands of students, and over 3,500 employees, PXU covers 220-square miles of Arizona's capital city. If the K-8 students in its 13 elementary partner school districts were included, it would be among the 25 largest unified school districts in the country.

Phoenix Union has drastically improved graduation rates, reduced dropout rates, and continues to close the "Achievement Gap" so often cited between high-minority, low-income districts, and national averages. PXU's four-year graduation rate surpasses the state average, and its dropout rate is lower than the state average.
